

Helotes Pediatrics is now offering enrollment in CHADIS, an online tool for completion of screening forms and questionnaires. CHADIS helps you share important information with your provider. CHADIS can be used by patients, parents, teens, grandparents, caregivers or teachers. All answers you enter are confidential and are only seen by your provider. Using CHADIS, you can share your concerns and complete questionnaires to help the clinician evaluate health, behavior and development.

Examples of forms include Developmental (ASQ-3) and Autism (MCHAT) screens, ADHD questionnaires (Vanderbilt), Lead and TB risk screening and Asthma monitoring (Asthma Control Test). These forms can be completed online prior to the appointment via personal computer, tablet or mobile phone.

Enrollment is easy. Visit <https://site.chadis.com>

If this is the first time visiting CHADIS, click Register and enter your information. The invitation code is 2103720505. You will be asked to select the type of visit.

Please login to CHADIS before every visit and complete the appropriate questionnaires. Forms will be available for Well Child Visits as well as certain conditions if pertinent to your child, including ADHD, Anxiety, Depression and Anxiety.
